Stage 3 Total Time:

STOCK SERVICE PISTOL DIVISION: popular "stock" Double Action/Safe Action factory service pistols such as the Glock, Beretta, S&W, Ruger, Browning and Sig.

ENHANCED SERVICE PISTOL DIVISION : popular Single Action 9mm/.38 Super/.40 service pistols such as the Browning HP, CZ-75, EAA Witness and 1911 pattern pistols.

CUSTOM DEFENSIVE PISTOL DIVISION: "practical" custom 1911 style .45 single stack pistols, while still allowing shooters using the various hi-capacity pistols such as the Para-Ordnance, STI/SVI and Glock 20/21 to compete on equal ground. There are many out-of-the-box 1911 style pistols that can be used competitively in this division with little or no custom work.

STOCK SERVICE REVOLVER DIVISION: popular service revolvers. The goal is to have competitors using common proven service revolvers such as the Smith & Wesson Model 66, 686 or Ruger GP-100.

ENHANCED SERVICE REVOLVER DIVISION: popular revolvers which use the "moon clip" method of reloading. Seven or eight shot cylinders may be used, however a maximum of 6 rounds may be loaded in the cylinder.

The classifier is designed to be shot as a continuous ninety (90) round match. While it is permissible to allow re-shoots due to gun problems and/or mental shooter errors for the purpose of accurate classification, no re-shoots are to be permitted of individual strings of fire. If the classifier is part of a scored match or the shooter is trying to attain a five (5) gun award, no re-shoots are permitted and it must be shot as one continuous ninety (90) round course of fire.

For positions for each string, refer to position chart after CoF description. Pistols must start from the mechanical condition of readiness appropriate to their design and be loaded to division
